

Crafting Your Action Plan

Preparing for the Group Discussion

- ❖ Who does what? Who “owns” the problem?

- ❖ In what order will steps be taken?

- ❖ What metrics reflect the current challenging elements? How would you like to see those change?

- ❖ Look back at the warning signals for the unit that concerns you: is your plan addressing those?

- ❖ Review your definition of “ what success looks like” for this unit: are you moving in that direction?

- ❖ How will the data be different after efforts to address the challenges faced by the unit?

- ❖ How will you activate the people of good will? Support them?
